

in regard to the matter of the pation to stop xm radio from bradcasting instnt traffic and weather. I feel they have every righth to broadcast these programs and i as a PAYING listerner I have every right to receive these programs. I use the services on a daily bases because of my constant traviling do to my job as a service tech.and have found them to be very helpful in guiding me around traffic backups. my wife also a xm listern also uses these services in her job as a service tech.If the over the air broadcasters feel they are losing listerners they are righth. maybe they should setp up to the plate and inprove the quality of the singal and offer more appeling listing chioces,and not go after xm radio for seeing the need and the market .NO ONE LIKES A CRY BABY
